Now Available in EMEA, FireLock EZ™ Style 009N DN250-DN300/10-12"

EASTON, Pa. – May 2, 2017 – Victaulic's [FireLock EZ™ Style 009N Rigid Couplings](#) are now available in 10"-12" sizes. The couplings provide a simple, easy-to-install rigid pipe joint in sprinkler piping systems.

Utilizing patented [Installation-Ready™ technology](#), the 009N Rigid Coupling installs 10 times faster than threaded assemblies and up to twice as fast as traditional grooved product. The couplings come pre-assembled, and are simply pushed onto a grooved pipe end, joined by a second grooved pipe end, and bolts and nuts are tightened – a process that used to take minutes now takes only seconds. The easy installation and maintenance of the Style 009N Coupling provides contractors and engineers with compressed project schedules, reduced material handling, reduced labor risk and enhanced jobsite safety.

About Victaulic

Since 1919, Victaulic's pipe joining and flow control solutions have optimized construction productivity and reduced risk, ensuring projects are completed safely, on time and within budget. Driven by a spirit of continuous innovation, Victaulic's portfolio of 100,000+ products and patented technologies promote freedom of design, as well as simplified inspection and maintenance for the life of any system.

With more than 3,500 employees and 40 international facilities, Victaulic helps customers in over 120 countries succeed in the global construction industry. From the tallest buildings to the deepest mines, customers trust our products to increase overall system durability in the most demanding construction projects and operating conditions. Learn more about how our innovative piping products and design services can engineer confidence into your build at www.victaulic.com.
