

MARKET

In the early 1920's Victaulic gathered its sea legs and began to demonstrate value in rigorous maritime applications. Victaulic products provided flexibility, ease of access and the ability to accommodate expansion and contraction in the water supply systems. The small product footprint and light weight design allowed our couplings to be employed in tight shipboard spaces and areas of the ship where a weld arc or fumes could be deemed extremely risky or nearly impossible.

During World War II, Victaulic couplings were installed in thousands of piping systems of merchant and navy ships.

Today, our products are certified by the U.S. Coast Guard and other global maritime agencies for many shipboard applications.
